Description

- **The ORIGINAL product**
- Urine residue remover with excellent solvent power
- Superb detergency and very fast effect
- Guarantees hygienic cleanliness
- Removes rust, limescale and urine residue

Application fields

- For all WCs and urinals made from ceramics

Instructions for use

Apply 500 ml of undiluted **SANIT Urine Residue Remover** under the rim around the WC bowl. Let the chemical agent work for 10 minutes. Rinse with fresh water.

Depending upon grade of contamination or deposits you can repeat the procedure. In case of stubborn deposits you can use a toilet brush additionally.

For use on urinals fill 100 – 200 ml (depending upon the size of the drain) of undiluted **SANIT Residue Remover** into the urinal. Let the chemical agent work for 10 minutes. Rinse with fresh water.

Not suitable for use on WCs and urinals made from stainless steel!
